Attorney's Docket No.: 12732-054001 / US5067

REMARKS

Claims 34-53 are pending in this application, with claims 34, 35, 46, 49 and 53, being independent. Claims 1-33 have been canceled and new claims 46-53 have been added.

In response to the restriction requirement, Applicants elect the invention of Group II (claims 34-41), drawn to a method of manufacturing a light emitting device. New claims 46-53 are believed to fall within the elected group.

The election is made without traverse with respect to Group I. However, applicants request that the Examiner reconsider the restriction of the claims of Group III (claims 42-45). Contrary to the Examiner's assertion, applicants do not agree that the claims of Group I can be used to make other materially different products from those recited in the claims of Group III. For example, claim 34 is directed to a method of manufacturing a light emitting device, while claim 42 recites "A light emitting device manufactured by a manufacturing method according to claim 34." While the action states that the method claims may be used to form ferroelectric thin films, formation of such films that did not also including forming an "electro luminescence layer" (and thereby forming a "light emitting device") would not fall within claims 34 and 35.
